

## 1:1 CARE ON THE RISE

Hello reader and welcome to this month's newsletter.

This month's focus, as you probably can tell from the headline, is to discuss 1:1 Care.

Over the last few months, we have been seeing the requests for assignments for this special care rise significantly.

### 1:1 Care

1:1 care is where an individual has been assessed and for their safety and well-being concerns, a personal carer is authorised to ensure that they are looked after from 24 hours a day every day to selected time periods when they are at most risk of, for example and not limited to, falling, meal times, getting dressed and washed, getting ready for bed etc.

Care homes are experiencing a significant rise in the number of residents that have been assessed as requiring specialist focused care.

1:1 care is seen as a gift of security and safety to the resident's family and friends, and is essential to the quality of care the care home provides all of its residents.

At Number 1 Healthcare Limited we have been providing outstanding "1:1 care" in care homes across the United Kingdom and have received some great feedback regarding how our carers have conducted themselves with mostly vulnerable, and troubled residents, most suffering with that dreadful life altering for all concerned, Dementia.

*"I would like to give you some feedback concerning "K" one of your Healthcare Assistants. He has been coming to our care home for a month now. He looks after "F" one of our resident who is on long term 1:1. "K" has provided excellent care and "F" seems to be much happier with his situation. "F"'s family have also noticed that he and "K" get along fine and wish you to know what a great job "K" is doing and wanted to thank you"*

Manager of a care home in Goole "M"

As always, we wish you the best of health and thanks for reading.,
